

FEATURED PROJECT:

OCHSNER HEALTH

>> Charlotte Pipe and Foundry Product Used

- ChemDrain® pipe and fittings in sizes from 2" through 4"

Description: When Gootee Construction, one of the largest mechanical contractors in Louisiana, was selected to complete an emergency expansion of Ochsner Health to meet the demands of COVID-19, they selected ChemDrain, a chemical waste plumbing system, for use within the ICU rooms.

ChemDrain pipe and fittings were used as an option in lieu of the alternative polypropylene / PVDF system. This emergency project could not afford to lose any time in order to meet the challenging completion date. Ease of installation and time saving benefits were the main contributing factors for its selection. The Schedule 40 CPVC system is used for corrosive waste systems, including in the dialysis treatment areas.

PROJECT TYPE	>>	Hospital/Healthcare
DATE OF COMPLETION	>>	June 2020
GEOGRAPHIC REGION	>>	South
APPLICATION	>>	Corrosive Waste Drainage
PROJECT LOCATION	>>	Jefferson, LA
PROJECT ENGINEER	>>	YKMH Consulting, LLC
