

FEATURED PROJECT:

ONE VANDERBILT OFFICE TOWER

Description: One Vanderbilt Office Tower is one of New York City's newest landmarks. Standing at 1401 feet, it is the fourth tallest building in Manhattan. It is also one of the greenest.

It makes sense that this signature project is using a full line of cast iron soil pipe and fittings, the top DWV plumbing material available. One Vanderbilt has over 1.3 million square feet of rentable office space, along with an observation deck, luxury retail at street level, and an 11,000 sq/ft restaurant owned and operated by world renowned chef Daniel Boulud.

>> Charlotte Pipe and Foundry Products Used
